Lock Box Policy

Knox Boxes are required to be mounted on a building if the building has a fire protection system. Other instances that may require a lock box include frequent response, security gates at building entrances, or as determined by the Fire Marshal.

Surface mounted boxes shall be mounted 6' above grade to the bottom of the box in an area that the ground surface is level.

Flush Mounted boxes can be mounted 5'-6' above grade to the bottom of the box in an area that the ground surface is level.

The box location will be determined during plan review for new applications or during a site inspection.

Step 1

Go to
www.knoxbox.com/greshamfd

Step 2

Find your product from photos
or the "Search by Product
Number" dropdown list.

Step 3

Select & configure product
and add to cart.
